

Data Science Issues & Collaboration

Advanced
Analytics

Eugene Wen, MD. DrPH.
VP – Group Advanced Analytics
Manulife

Canada Data Science Workshop,
Toronto, April 30, 2018

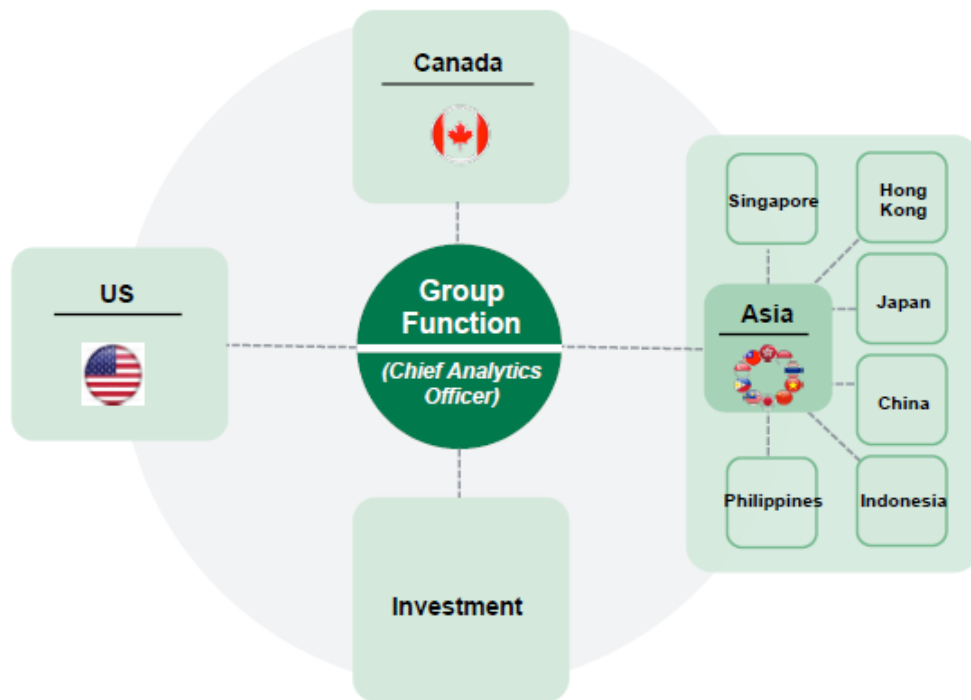

Our Advanced Analytics teams are organized in a **hub-and-spoke** model, supporting local and global needs

Cindy Forbes,
EVP, Chief Analytics
Officer,

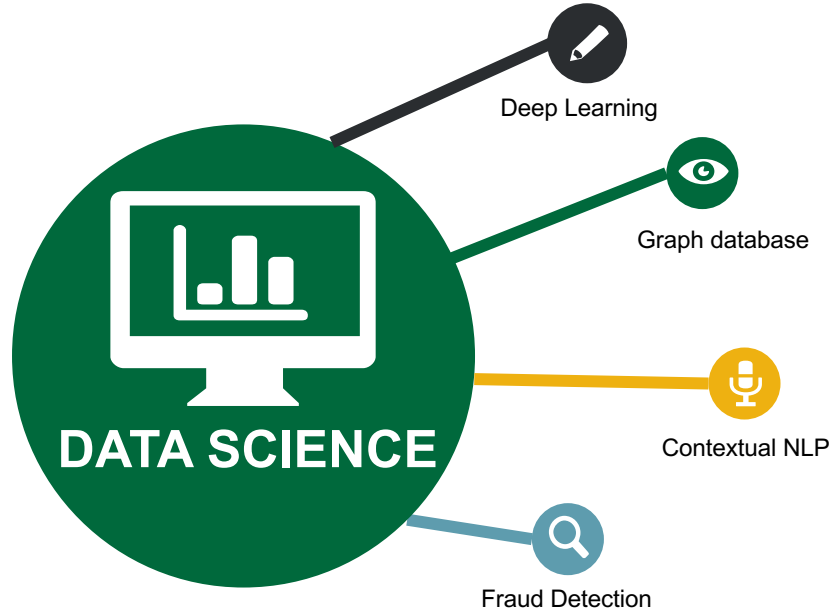

former Global
Chief Actuary,

Chair of Governors,
University of
Waterloo

Data Science Issues for Research

- 01 DEEP LEARNING**
How can deep learning support customer service and other tasks in financial institutions?
- 02 GRAPH DATABASE**
How can we better store, analyze and visualize relationship data for business usage?
- 03 CONTEXTUAL NLP**
How can we better understand customer needs and improve customer experience?
- 04 FRAUD DETECTION**
We have billions of transactions. How can we identify fraudulent transactions in all of the data?

Collaboration with Universities:

Data

Understanding

Coordination

Thank you!
